

AMENDMENT TO THE ABSTRACT:

Please amend the Abstract as follows:

The process of navigating on a computer network with a data processing device comprising, on the one hand, a screen (52) smaller than the size of a server page (11) and, on the other hand, means for designating a zone (12) of the screen (52), consists of displaying the selection zones on the screen (52) to the exclusion of the information (13), and another page (121 to 125) is called up by designating one of the displayed zones (12).
